Latest NEWS from the Innovations factory...

New products 2024

BG-FILCOTEN[®] connect

This innovative product is used for running cables beneath ground level, making them discreet and accessible – and it does its job perfectly. BG-FILCOTEN[®] connect combines utmost ease of maintenance with a great robustness - ideal for Exhibition and Event Halls as well as Manufacturing Spaces and Industrial Applications. Are you a little curious? Find out more on pages 40 and 41.

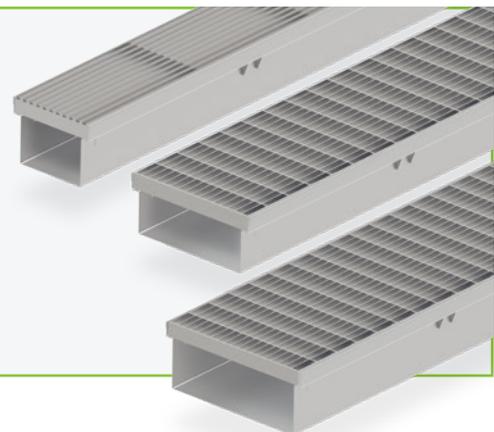

BG-FILCOTEN[®] green

Introducing the BG-FILCOTEN[®] green: A Leap Forward in Sustainable Drainage Solutions. Engineered with filter material, this advanced system offers not only efficient water filtration but also high retention capacity. Uniting sustainability and performance, BG-FILCOTEN[®] green ensures superior protection of the water cycle while meeting the demands of Load Class E 600. A perfect blend of eco-conscious design and technical excellence. More info on pages 42 and 43.

BG-FLEX FA

Our successful BG-FLEX FA stainless steel façade channel drains now has an adapted design and multiple heights for even more flexibility in installation. And so that beauty is not neglected, there is also a new design longitudinal bar grating and other accessories. Are you curious? Then read more on pages 64 to 73.

Fields of application

Classification as per EN 1433

Load classes ¹⁾	Application areas	Channel type
 <p>A 15</p>	<p>Traffic areas which are only used by pedestrians and cyclists and similar areas e.g. urban green and open spaces.</p>	<p>self / spot / light 16 – 21 parkline / tec 22 – 27 FA 64 – 73 TE / TM / stone 74 – 77</p>
 <p>B 125</p>	<p>Sidewalks, pedestrian areas and comparable areas, car parks or car parking decks, garages, driveways.</p>	<p>light / spot 18 – 21 parkline 22 – 23 tec 24 – 27 omega / sigma tec 80 – 87</p>
 <p>C 250</p>	<p>Only applies to tops / drainage channels in the curbstone area which may extend 0.5 m into the carriageway and 0.2 m into the pavement, as measured from the curbside, and for roadsides not used by vehicles.</p>	<p>light 20 – 21 parkline 22 – 23 tec / pro 24 – 39 omega / sigma tec 80 – 87</p>
 <p>D 400</p>	<p>Carriageways of roads (including pedestrian zones), road verges, car parks and similar fortified thoroughfares.</p>	<p>pro / connect / green 28 – 43 one urban 50 – 55 one 56 – 61 citygrid 90 – 91</p>
 <p>E 600</p>	<p>Private thoroughfares which are used by vehicles with heavy wheel loads, e.g. routes for industrial construction.</p>	<p>pro 28 – 39 green 42 – 43 one 56 – 61</p>
 <p>F 900</p>	<p>Areas which are used by especially heavy wheel loads, e.g. air traffic areas of commercial airports.</p>	<p>pro 28 – 39 connect 40 – 41 one 56 – 61</p>

¹⁾ Load class in kN

Material description

Properties for material selection

FILCOTEN® HPC

FILCOTEN® HPC (High Performance Concrete) is a material that combines excellent technical properties with sustainability. The optimised high-density micro-structure of the HPC allows the construction of drainage channels in a lightweight design with the same stability and load class as conventional concrete systems. FILCOTEN® HPC is unique when it comes to environmental friendliness thanks to the sparing use of raw materials and due to the fact that it is tested for hazardous materials⁴⁾ guaranteed as harmless in terms of the biological standards of construction, as IBR certified³⁾, 100% recyclable²⁾.

- High-performance mineral concrete (dense, low-capillary, optimized structure)
- High strength and frost resistant
- Fire protection class A1
- Expansion coefficient identical to concrete
- UV resistant
- Compressive strength far exceeding the requirements of EN 1433
- Low water absorption and penetration
- 100% recyclable – quality class U-A²⁾
- IBR certified³⁾, free from: VOCs, styrol⁴⁾ and biozides, heavy metals, radioaktivty

Find more about FILCOTEN® HPC on pages 8 and 9.

Ductile iron

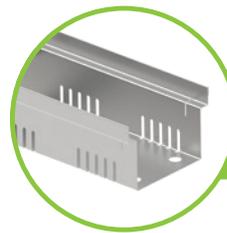

Ductile iron has a high level of resistance against aggressive media such as salt water. The “rust-brown” discolouration of the ductile iron is due to a natural oxidation process and provides protection against further oxidation. The so-called “rust” does not weaken the ground material and does not constitute a reason for a complaint.

Ductile iron gratings with EDP (electrophoretic dip painting) are available at extra cost.

Galvanized steel

Steel parts in the channel systems are coated in a protective zinc coating. To ensure lasting corrosion protection, this layer must itself be protected against mechanical and chemical damage. Contact with calcareous or cement-bound materials (screed, etc.) can destroy or dissolve the protective zinc layer. Condensation also corrodes the protective layer, which results in the formation of white rust formation (corrosion of the zinc layer) – this is not a defect.

Stainless steel

Contrary to popular belief, stainless steel can corrode. Base metals (in dust or chip form, for example) cause contact corrosion on stainless steel surfaces, forming „rust spots“. Therefore, we recommend storing our stainless steel channels and gratings in a dry place and sorted appropriately. Regular cleaning must be ensured in case of contact with de-icing salt. For our stainless steel edges and gratings, material no. 1.4301 (V2A) is used as standard. Stainless steel gratings made from material no. 1.4571 (V4A) are available at extra cost.

²⁾ Quality class U-A (certified by the BVFS).

³⁾ Meets the strict criteria of the Rosenheim Institute for Building Biology (IBR).

⁴⁾ No use of synthetic resins.

FILCOTEN[®] HPC:

Just like concrete, only better.

The 100% mineral high-performance concrete FILCOTEN[®] HPC is an enhanced form of traditional concrete. Its engineering and ecological properties are achieved without the use of any styrenes, synthetic fibres or polymers. The optimised high-density structure of HPC makes it possible to construct highly stable lightweight drainage channels – but it's the idea behind it that makes it unique.

Minimal weight

- FILCOTEN[®] HPC enables lightweight construction
- Quick and easy to install
- Dimensionally stable, robust concrete elements

Perfect hold in the concrete bed

- Ideal expansion coefficient, identical to that of the surrounding concrete

High drainage performance

- Low water absorption and penetration
- Smooth channel surface for high drainage performance and optimal self-cleaning effect

Resistant to extreme temperatures and UV light

- Maximum resistance to frost and de-icing salt
- UV resistant

Fireproof

- Non-combustible building material – Class A1
- Therefore emits no toxic smoke

Maximum robustness

- Unsurpassed stability and durability
- High pressure resistance, clearly exceeding the requirements of EN 1433 for concrete channels

Verified life cycle assessment (LCA)

- Enhanced ecological transparency, in acc. with ISO 14040/14044 and EN 15804:A2
- Ideal for sustainable construction projects

Resource efficiency

- 100% recyclable, certified
- Quality class U-A ³⁾

Sustainable production

- Resource-efficient manufacturing process
- Up to 70% ⁴⁾ less sand and gravel
- Up to 55% ⁴⁾ less cement
- Up to 51% ⁴⁾ less water

Clean energy for clean products

- Manufactured using 100% green energy
- 17.56% from in-house photovoltaic plant
- No fossil fuels used whatsoever

Certified for sustainability and tested for hazardous substances

- Certified environmental and energy management to ISO 14001 or 50001 standards at the location in Oberwang/AT
- Certified biologically sound construction material that meets the stringent testing criteria of the IBR, the Institute for Biologically Sound Construction, for heavy metals, VOCs, biocides and radioactivity; styrene-free ¹⁾
- certified ²⁾ in acc. too KIWA BRL 5070

¹⁾ Free of synthetic resins. ²⁾ KIWA certificate no. NL BSB® K43940. ³⁾ Certified by the Salzburg Institute for Construction Engineering Research (bvfs)
⁴⁾ Compared to a comparable product made of concrete.

Goodbye greenwashing, hello full transparency.

Today, many companies claim sustainability credentials, but the key question is: how much of this environmental protection is just a green facade?

Full transparency – nature deserves it.

With our BG-FILCOTEN® products, we are following a unique path of total transparency and have subjected the system to a rigorous, independent life cycle analysis ¹⁾. This takes the form of a **Life Cycle Assessment** in line with ISO 14040 & ISO 14044 or EN 15804:A2 and uses recognised indicators such as the Global Warming Potential (GWP), Cumulative Energy Expenditure (CEE) and Abiotic Resource Use (ARU).

We play with our cards on the table – and even let others look over our shoulder.

To confirm our transparent data, the product Life Cycle Assessment for phases A1–A4 was subsequently verified by external experts ²⁾ in line with EN 15804:A2.

Analysed and verified by:

¹⁾ ECODESIGN company – www.ecodesign-company.com

¹⁺²⁾ TerraNEXT – www.terranext.io (verification Q4/2024 completed)

Product life cycle

Phases A1-A4

A1 Raw material sourcing

Extraction and purchase of resources or raw materials.

GWP³⁾ = 71.90 %

A2 Transportation

Delivery of resources and raw materials from the supplier to the manufacturer.

GWP³⁾ = 5.26 %

A3 Production

Production of the product by the manufacturer.

GWP³⁾ = 2.36 %

A4 Transportation

Delivery of the product from the manufacturer to the customer.

GWP³⁾ = 20.48 %

Total GWP³⁾ (Global Warming Potential)

Total global warming potential of phases A1 – A4.

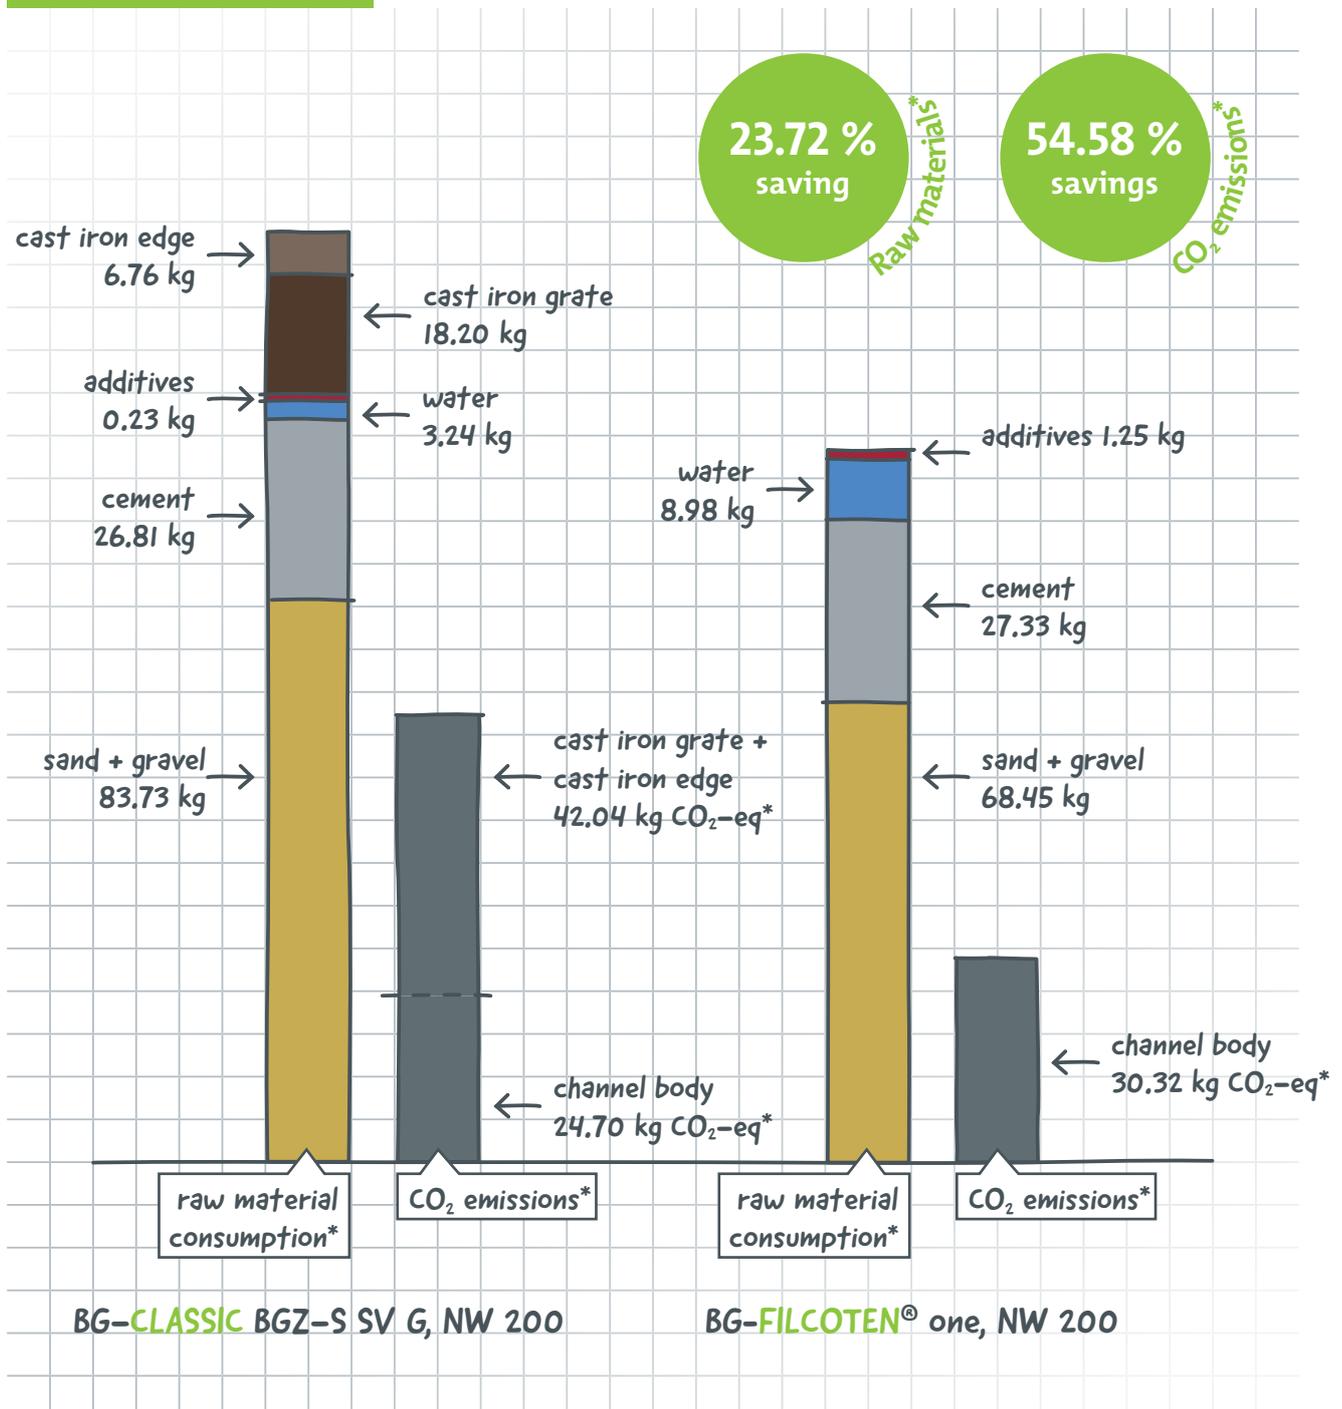

100 % = 42.2 kg CO₂-eq

*) The GWP values are based on one metre of BG-FILCOTEN® one NW 200.

Less raw material consumption fewer CO₂ emissions.

Because sustainability and climate protection start with the material...

A comparison of FILCOTEN® HPC with conventional concrete shows how resources in construction projects can be saved while also having the capacity to significantly reduce CO₂ emissions.

Simply effective and sustainable: The FILCOTEN® HPC formula ...

	NW 200	Global warming potential AI – A4 (500 km Transport)	Total global warming potential for AI – A4 500 m of channel run****
	BG-CLASSIC BGZ-S SV G	79.9 kg CO ₂ -eq**	39,950 kg CO ₂ -eq**
	BG-FILCOTEN® one, no. 0	42.2 kg CO ₂ -eq**	- 21,100 kg CO ₂ -eq**
			= <u>18,850 kg CO₂-eq</u>

A saving of **18,850 kg CO₂ equivalent** equals...

.....75,825 km

...approx. 75,825 km journey of a diesel passenger car (248.6 g/km CO₂-eq)***

.....17,512 km

...approx. 17,512 journey of a 40 tonne semitrailer truck (1,076.4 g/km CO₂-eq)***

***) Value basis LCA environmental indicators according to ISO 14040 and ISO 14044 modules A1-A4 in accordance with EN 15804:A2, BG-Graspointner LCA report 2018, LCA calculator 2023, provided by ECODESIGN company – www.ecodesign-company.com

****) Source: Emission figures of the Austrian Federal Environment Agency, database 2021. Figures used consider total emissions, including statistically average occupancy rates.

BG-FILCOTEN[®]

Be it regular day-to-day business or special projects involving extreme challenges, BG-FILCOTEN[®] channel systems are in their element on any terrain. After all, these drainage systems represent the high art of engineering and the culmination of many years of experience working to meet the needs and requirements of our customers.

Our FILCOTEN[®] HPC (High Performance Concrete) enables intelligent lightweight construction that affords greater drainage performance, convenient installation and maximum stability and robustness for highly efficient solutions.

19015232	light front/end cap with outlet DN 100	galvanized steel	0.4 kg	
19016206	pro no hub bottom outlet 6" (150 mm)	galvanized steel	0.6 kg	

Gratings: BG-FILCOTEN[®] light, NW 150 mm / 6"

Slotted grating NW 150
SW 8/130,
class A, galvanized steel

Mesh grating
MW 30/10, accessible by car
galvanized steel and stainless steel /
NW 150 galvanized steel only

Ductile iron mesh grating, class C
MW 15/28 for NW 150

Accessories:

No Hub bottom outlet DN 100 to 200
for NW 100 to 300

Bottom outlet on site installation

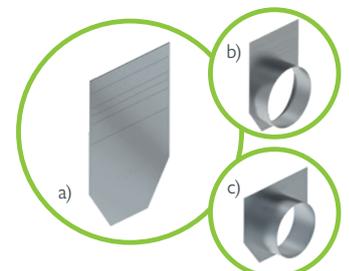

light sump unit, L = 500 mm,
incl. silt bucket made of plastic,
to fit NW 150

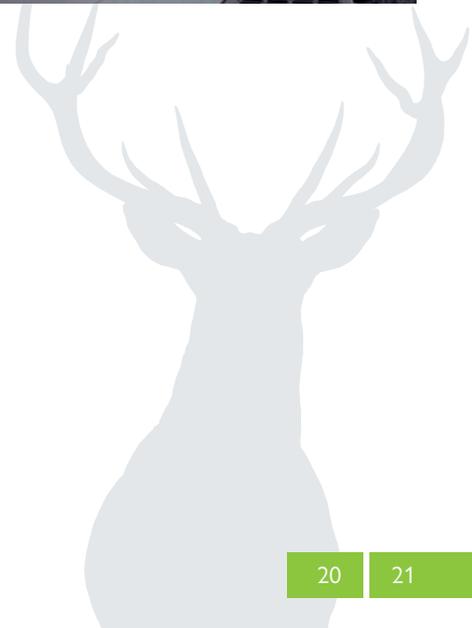

Positioning of outlet drilling: Channel end to outlet opening centre = 250 mm

- a) front cap NW 100 / 150
- b) end cap NW 150 with outlet DN 150
- c) end cap NW 150 with outlet DN 100

Channels no. 0-10:

Channels no. 11-20:

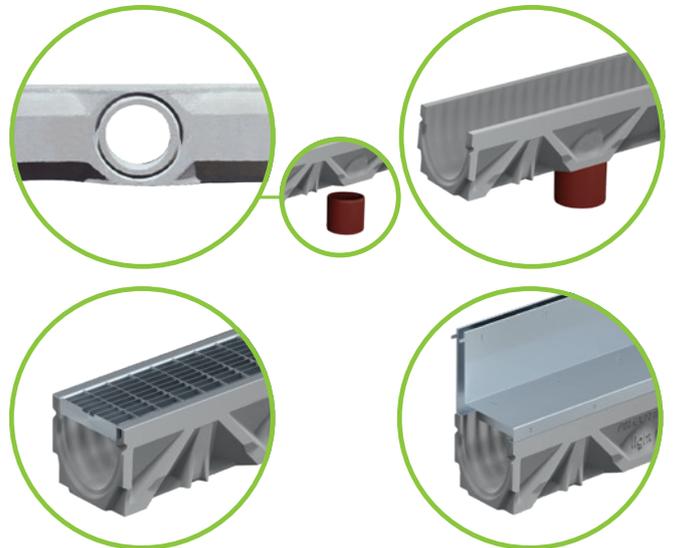

In-/Outlet cross-section

If channel runs have a line length of more than 2 meters, the water flows off just as well with a slot top as with a classic cover.

The reason:

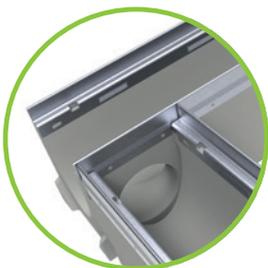

The inlet cross-section of the slot top is – as the inlet cross-section of a classic cover – larger than the flow cross-section of the connected sewer pipe. The amount of draining water is limited by the drainpipe and not by the inlet cross sections of the cover.

Channel body with outlet opening

The position of the outlet opening and/or the lateral drill-hole (left/right) can be freely selected for 5-0 channels.

Maximum lateral drilling diameter:
- with NW 100 \varnothing 86 mm

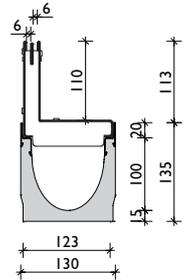

For questions, please contact our technical support team.

Channel body with outlet opening

The position of the outlet opening and/or the lateral drill-hole (left/right) can be freely selected for 5-0 channels.

Maximum lateral drilling diameter:

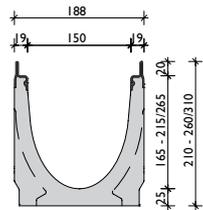

- with NW 100 Ø 86 mm
- with NW 150 Ø 130 mm
- with NW 200 Ø 180 mm

NW 300

Tangled cables? Not with us ...

Sturdy, maintenance-free, efficient:

BG-FILCOTEN[®] connect

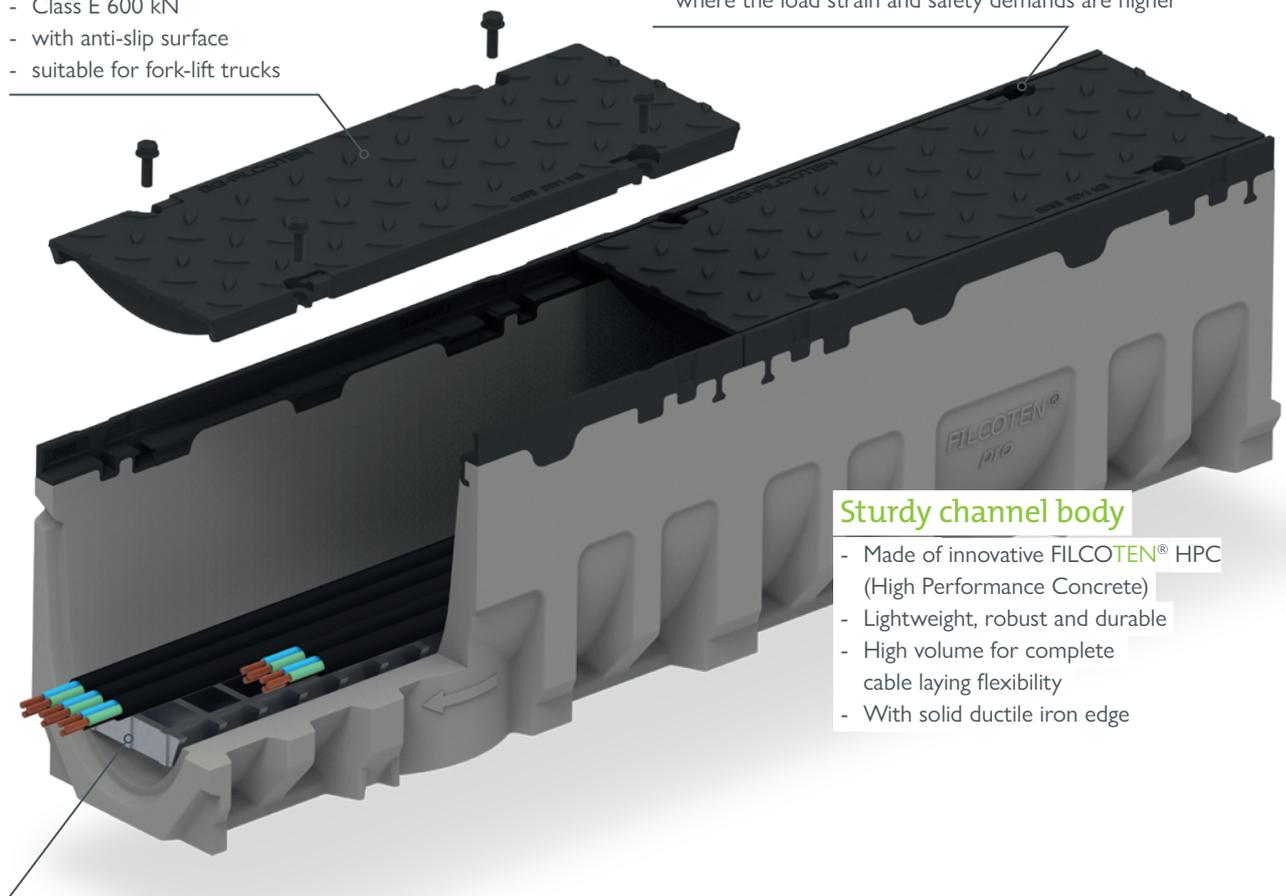

BG-FILCOTEN[®] connect makes laying cable bundles so much simpler. Because this innovative media duct is not only sturdy and lightweight – making it easy to install – its intelligent design means that it is also extremely easy to service and maintain. Giving you the flexibility you need every time.

Closed cover

- Class E 600 kN
- with anti-slip surface
- suitable for fork-lift trucks

Grating lock

- Integrated fix-locking for quick and easy removal of the grating
- Bolt connections optionally available (8 per metre) where the load strain and safety demands are higher

Sturdy channel body

- Made of innovative FILCOTEN[®] HPC (High Performance Concrete)
- Lightweight, robust and durable
- High volume for complete cable laying flexibility
- With solid ductile iron edge

Functional cable support

- Provides dry support for cables used outdoors should rain ever seep into the system
- Electrically non-conductive due to plastic construction

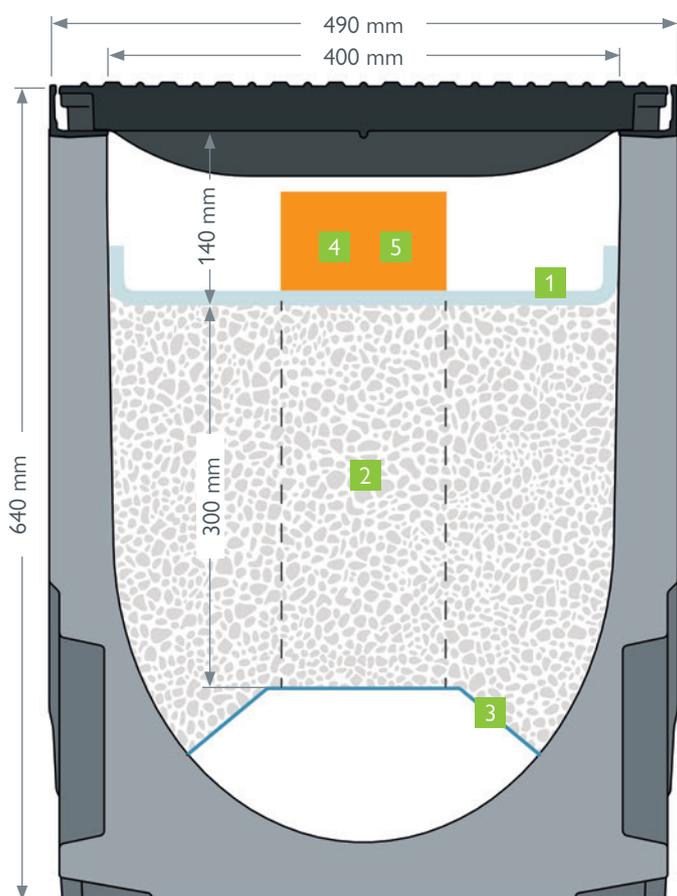

Your benefits at a glance:

- Sturdy, lightweight and durable thanks to the FILCOTEN[®] HPC
- Bolt-mounted grating; nuts and bolts replaceable
- Non-conductive due to use of GFR²⁾ in the cable support
- Ideal for exhibition and event halls as well as for factory premises and production plants

²⁾ GFR: Glass fibre reinforced plastic

We set the Water a new **purity standard.**

The new BG-FILCOTEN® green features an innovative filter system, enabling superior cleaning performance. At the same time, the system is easy to install and maintain.

1 Pre-filter fleece for efficient preclearing.

- The pre-filter non-woven material keeps out coarse dirt, protecting the high-quality technical filter material
- Very easy to install, maintain and replace

2 Innovative cleaning filter material.

- Filter material in optimised quantity (height: 300 mm)
- Highest possible cleaning class
- Homogeneous material, no separation during use
- No risk of remobilising heavy metals due to water containing de-icing salts

3 Trapezoid-shaped perforated sheet metal made from stainless steel.

- Separates the filter substrate zone from the drainage area, keeping the transverse drainage section permanently clear
- Optimised perforated surface for maximum drain of water

4 Integrated Control & water sampling shaft.

- Control/water abstraction shaft for visual control and sampling
- Easiest handling: Remove the grating and take the water sample
- The purified water can then be taken and tested for its ingredients

5 Innovative overflow Ø 150 for efficient heavy rain drainage.

- Effective protection even in most extreme rainfall
- Cleaning of polluted first flush via the technical filter
- Unpolluted excess water can drain out through the overflow pipe in a controlled way
- ATTENTION! Approval of the authority must be given for this device.

Anti-vandalism locking device for all gratings with fiX locking for NW 100/150/200 – except slotted gratings and COMBee design gratings (tec / pro).
Required per grating: 2 pieces

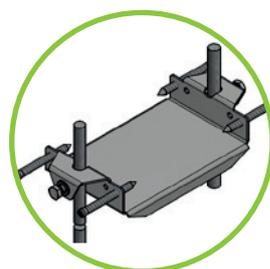

i Detailed description on page 45

Bolting kits for pro (to be ordered separately) consisting of:
1 pc. bolt, 1 pc. nut galvanized steel or stainless steel

Suitable for use with gratings: see table per NW
See footnotes!

i M8 for NW 100 – 200 / 10 for NW 300 – 400

Rebar support, available for NW 100 to NW 300

A connection, that keeps our promises.

The various different fixing options for our gratings meet the requirements of channel standard EN 1433. Furthermore, they also allow you to adapt the safety measures to your own specification. The

fiX-locking ensures a rapid, secure fixing of the grating while the anti-vandalism locking device goes one step further.

More security on request: optional anti-vandalism locking device (for NW 100 mm / 4" , 150 mm / 6" and 200 mm / 8")

Step 1:
Push the locking device into the fitting springs provided for this purpose until it snaps into place.

Step 2:
Attach the grating as described for the fiX-locking below into the BG-FILCOTEN® tec/pro channel.

Step 3:
Push the grating firmly into the channel until it snaps into place.

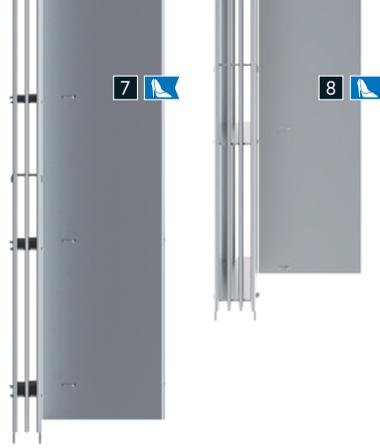

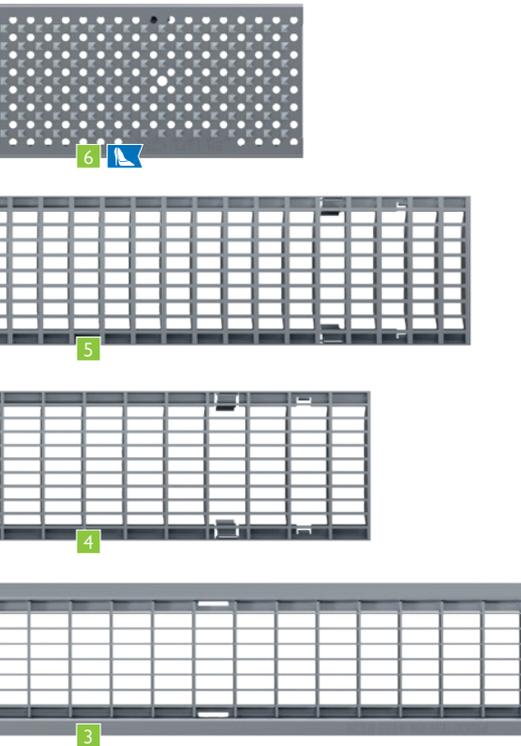

Step 4:
Lock the anti-vandalism device by twisting the bolt.

Simply secure: the 4 point fiX-locking

The „fiX-locking“ enables a 4 point boltless locking device for the grating in the channel. The fitting springs for each grating variant engage in the recess in the edge provided for this, and the grating is simply and securely mounted.

- The coverings are initially inserted on one side of the channel with an exact fit and are locked by means of a simple turning of the grating.
- When doing this, look out for the recesses in the edge in which the clamps against longitudinal slipping engage.
- The fiX-locking fixes the grating in the edge. This connection can be unfastened by pulling it out.
- The fiX-locking system can be used with ductile iron and mesh gratings.

Monolithic, versatile, good.

BG-FILCOTEN[®] one urban

The BG-FILCOTEN[®] one family has a new addition. And, just like any other family, the BG-FILCOTEN[®] one urban is a totally novel, new arrival on the market. With manifold innovations and a D 400 load class all rolled into one, it offers up a ton of useful features – making it the perfect all-rounder for urban spaces.

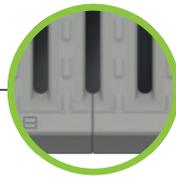

Overview of applications

Roads, inner cities, pedestrian zones, cycle paths, gardening and landscaping, car parks, sports complexes.

Class D 400

Inflow opening in the channel joint

Inlet opening in the joint with standard slot width for ideal water drainage

Tenon system for non-directional installation

- Non-directional channel joint for easy and fast installation
- Interlocking tenon system for snug, truly-aligned positioning of elements
- Predefined distance in the joint for optimum function of the insertable sealing profile

Easy-to-handle sealing system¹⁾

- preformed groove on the front/end sides for easy insertion of the sealing profile
- Permanently sealed joints, guided by the tenon system
- Requirements according to EN 1433

High-performance

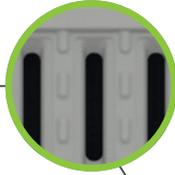

High, large-capacity channel body for enhanced drainage performance

GRASPOINTNER
Sustainable innovation.

Cyclist- and pedestrian-friendly

- Grippy, anti-skid pimple surface for pedestrian zones
- Optimised slot widths for safe driving and walking: NW 100 = 10 mm, NW 150 = 12 mm, NW 200 = 15 mm
- Slot widths according to EN 1433

Integrates fully with the surrounding environment

Surface in characteristic concrete colour

Optimised inlet surface

Recessed inflow openings and pimple surface for enhanced water collection performance and winter road services

Monolithic structure

- Element made entirely of FILCOTEN® HPC
- Extremely robust and wear resistant
- ideal for dynamic exposure in road traffic

Verified LCA (life cycle assessment)

- low greenhouse gas emission levels
- Manufactured with 100 % green power
- resource-efficient manufacturing process

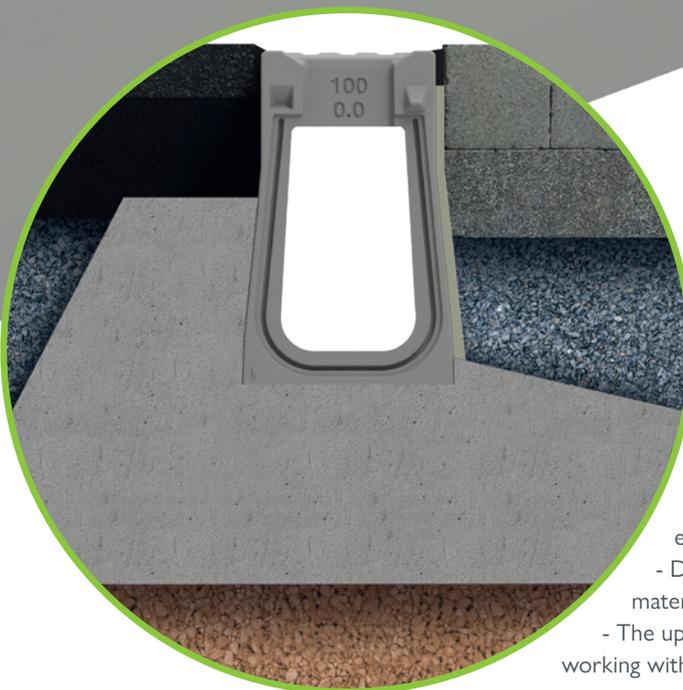

Multiple certifications

- 100% recyclable, certified quality class U-A⁴⁾
- Certified organic material that meets the strict testing criteria of the Institute for Biologically Sound Construction Rosenheim (IBR) with regard to heavy metals, VOCs, biocides and radioactivity, styrene-free²⁾
- certified³⁾ in acc. with KIWA BRL 5070

Re-designed; multiple benefits: the trapezoidal shape

- Enhanced anchoring performance in levelling concrete
- Optimised structural safety; can be installed as Type I – with so-called Type I installation, no concrete casings are required
- Wide channel foot for solid positioning of the gutter, even during installation
- Due to its very construction, the required grouting joint automatically materialises when installing in curb stone areas or upright areas
- The upper 90 mm of the channel wall are vertical in order to enable ideal working with pavement covering

¹⁾ Optional sealing profile.

²⁾ No use of synthetic resins.

³⁾ KIWA certificate number: NL BSB® K43940.

⁴⁾ Quality class U-A (certified by the experimental and research Institute for construction Salzburg)

Well thought-out elements make an outstanding system.

What is a good drainage system all about? Quite simply, it must be more than the sum of its parts. When developing BG-FILCOTEN® one urban, from the start, we always focused on the entire system, not just on the individual single parts.

Class D 400

Intelligent solutions for your requirements

We achieved a great number of intelligent solutions for more efficiency, performance and, above all, easy and safe handling – from the first installation, to the daily use through to the routine maintenance.

One grating – one design

- continuation of the slotted grating design for the cast iron grating
- edge and grating, cathodic dip-coated
- fix-locking as well as 4 point bolted possible
- Class D 400

Sump unit, one part

- Suspended silt bucket for sump unit
- Total length 500 mm
- closed base
- Outlet NW 100 / 150 with DN 150; NW 200 with DN 200 (pipe coupling)
- Left/right rotation
- Maintenance access in the style of the channel run

Outlet element

- Outlet unit NW 100 with DN 100; NW 150 with DN 150 and NW 200 available with DN 200 opening.
- The drainpipe can be serviced/cleaned through the removable grating.

Revision element

- Maintenance access in the style of the channel run
- T-piece with knock-out section (optional)
- Total length 1000 mm
- closed base

Sump unit, upper part

- simple cleaning of the outlet unit
- large outlet opening in the channel bottom
- Suspended silt bucket for sump unit
- T-piece with knock-out section (optional)
- Total length 1000 mm

Front cap

- interlocking
- closure of the channel run

End cap with outlet

- interlocking
- Closure of the run with socket (pipe coupling)
NW 100: DN 100; NW 150: DN 150;
NW 200: DN 200

Basic channel

- NW 100, NW 150 or NW 200
- Standard construction height no. 0
- Total length 1000 mm

sump unit, bottom part

- socket (pipe coupling)
NW 100 / 150: DN 150;
NW 200: DN 200
- left/right rotation

Sustainability in action: FILCOTEN® HPC (High Performance Concrete)

- cement-bound, mineral material
- extremely durable, stable and UV-resistant
- extremely resistant to frost, de-icing salt, oil, gasoline
- 100% recyclable, certified¹⁾
- certified environmental and energy management according to ISO 14001 or 50001 at the location of Oberwang/AT
- tested by the IBR – safe in terms of sustainable building

¹⁾ according to the guidelines of the Austrian Construction Material Recycling Association. ²⁾ Institute of Baubiologie Rosenheim.

BG-FILCOTEN® one urban, NW 100

Monolithic channel made of FILCOTEN® HPC (High Performance Concrete) Class D 400

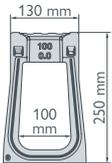

Item no.	Monolithic channel body D 400 – no slope	Class acc. to EN 1433	Weight	Pcs./Pallet	Euro/pc.
15110100	one urban NW 100 no. 0, Type I, L = 1000 mm, SW 10/70 mm	D 400	43.0 kg	15 pcs.	

BG-FILCOTEN® one urban, NW 100: Inlet cross-section 195 cm²/m | Discharge cross-section 155 cm²/m

Accessories

for BG-FILCOTEN® one urban, NW 100

Item no.	Accessories	Class acc. to EN 1433	Weight	Euro/pc.
15110000	Corner element, variable, NW 100	D 400	36.3 kg	
15110180	Maintenance unit NW 100, no. 0, L = 1000 mm incl. ductile iron grating ¹⁾	D 400	41.2 kg	
15110190	Outlet element NW 101 no. 0, L = 1000 mm incl. ductile iron grating, with DN 100 drill hole ¹⁾	D 400	40.8 kg	
15110170	Sump unit, one-piece, NW 100 no. 0, L = 500 mm incl. ductile iron grating, silt bucket, DN 150 outlet ¹⁾	D 400	43.8 kg

19110095	Sump unit bottom section, NW 101, DN 150 outlet		30.0 kg	
19110100	Front cap, NW 100, no. 0, without outlet		1.8 kg	
19110110	End cap NW 100, no. 0, with DN 100 outlet		1.4 kg	
19110900	Lifting hook (consisting of 2 pcs.) NW 100, painted blue		0.4 kg	
19000707	Sealing profile one urban, NW 100		0.1 kg	
32103	pro bolting material for ductile iron gratings class D (1 pc. bolt, 1 pc. nut – 4 pcs. required per m)			
32109	pro bolting material stainless steel, for ductile iron grating class D (1 pc. bolt, 1 pc. nut – 4 pcs. required per m)			

Maintenance unit or outlet element incl. ductile iron grating

Sump unit upper and lower sections DN 150

Sump unit, one-piece, incl. ductile iron grating, silt bucket, outlet DN 150

Corner element, variable

Lifting hook, painted blue for NW 100, 2 pcs. per set

Is a joint sealing profile required? Please say so with your order.

End cap with outlet

Front cap closed

References

Singularly **one,** simply **strong.**

Extraordinary challenges demand superior solutions. Needless to say, this also applies to draining heavily-loaded infrastructures, such as factory premises, logistics centres, terminals or airports. This is where the BG-FILCOTEN® one comes into play – and immediately takes the top spot. Because its channel and grating are cast in one piece, and constructed using the most innovative material on the market: FILCOTEN® HPC (High Performance Concrete).

Absolutely world class – from E 600 to F 900.

The result is an exceptionally sturdy and robust heavy-duty channel for load classes E 600 & F 900 that delivers on high drainage performance. Whether trucks, semi-trailers or aeroplanes: all of them need reliably drained surfaces to travel over – all of them need the new BG-FILCOTEN® one.

Your benefits at a glance:

- Outstanding performance in load classes E 600 & F 900.
- Exceptionally sturdy and durable thanks to the FILCOTEN® HPC monolithic structure.
- Innovative design with intelligent features; sits snugly in the concrete bed.
- Simple to install; easy-to-handle sealing system.
- Sustainable, 100 % recyclable, made using 100 % green energy.

Inflow opening in the channel joint

Inflow opening in the joint with standard slot width for ideal water drainage

Tongue/groove/tenon system for installation in either direction

- Non-directional channel joint for easy and fast installation
- Interlocking of the groove/tongue/tenon system for accurate, aligned setting of the elements
- Predefined distance in the joint for optimum function of the insertable sealing profile

Highly efficient water run

- Channel cross-section with innovative corrugated W-profile design for optimum hydraulic performance on partial and complete filling
- High self-cleaning effect of the W-profile as this causes turbulence in the inflowing water

Easy-to-handle sealing system ⁵⁾

- Preformed groove on the front sides for easy insertion of the sealing profile
- Permanent joint sealing through tight fit of the groove/tongue/tenon system
- Requirements according to EN 1433

Class E 600 & F 900

Optimized inflow openings

- Slot widths according to EN 1433
- Innovative S-design for efficient rainwater inflow

Cyclist- and pedestrian-friendly

- Counter-rotating radial arrangement of the inlet openings
- Safe to drive and walk over thanks to the S-design of the double slots

Monolithic structure

- Element made entirely of FILCOTEN® HPC
- Extremely robust and wear resistant
- Ideal for dynamic exposure in road traffic

Verified LCA ³⁾ (Life Cycle Assessment)

- Greater ecological transparency
- Manufactured with 100 % green power
- Resource-efficient manufacturing process

www.say.bg/en/one_pdf

At one with the surrounding environment

Fine finished concrete structure and surface.

Extremely durable hold in the concrete bed

- Lateral anchoring pockets for maximum anchorage in the concrete bed
- Permanent fit in the foundation thanks to identical linear expansion coefficient
- Perfect connection between HPC and concrete

Areas of use: one for many.

BG-FILCOTEN® one is the first choice wherever heavy dynamic loads may occur. The reason is obvious: Thanks to its monolithic structure and the sophisticated design, it combines an unprecedented number of benefits in one channel system.

Overview of applications:

- airports
- harbours
- terminals
- highways
- industrial areas
- logistic centres
- railway crossings
- truck parking spaces

¹⁾ Meets the strict criteria of the Rosenheim Institute for Building Biology (IBR).
²⁾ Quality class U-A (certified by the Bautechnische Versuchs- und Forschungsanstalt Salzburg (bvfs)).
³⁾ In line with ISO14040, ISO14044, EN15804. ⁴⁾ No use of synthetic resins ⁵⁾ Sealing profile on request.

Perfectly matched for everything that comes along.

What is a good drainage system all about? Quite simply, it must be more than the sum of its parts. This is especially true for heavy-duty applications where, literally, particularly weighty challenges need to be overcome for all components. With this in mind, we focused on creating an entire, robust and high-performance system when developing the BG-FILCOTEN® one.

Intelligent solutions for particularly weighty challenges.

The result is numerous, intelligent solutions that deliver on greater efficiency, robustness and durability and, above all easy and safe handling. Starting with the initial installation and continuing in their daily use and routine maintenance operations.

Class E 600 & F 900

One grating – one design

- Consistent continuation of the S-design, including on cast iron grating
- Edge and grating, cathodic dip-coated
- 4-point bolting
- Class F 900

Basic channel

- NW 200 or NW 150
- Standard construction height no 0
- Total length 1.000 mm

Outlet unit

- Outlet unit NW 150 with DN 150 and/or NW 200 available with DN 200 opening.
- Drainpipe can be serviced/cleaned through the removable grating.

Maintenance unit

- Maintenance access in the style of the channel run
- Total length 1.000 mm
- Closed base

Front cap

- With tongue/groove/tenon system
- Closure of the channel run

End cap with outlet

- With tongue/groove/tenon system
- Closure of channel with socket pipe connection NW 150: DN 150 and NW 200: DN 200 (pipe coupling)

Easy access

- Simple cleaning of the outlet unit
- Large outlet opening in the channel bottom
- Suspended sediment bucket for sump unit
- Total length 1.000 mm

Adapter cap

- For stepped slope installation
- From height no 0 to 40-0

Retention & stepped slope

- Height 40-0 (20 cm higher than no. 0)
- For higher hydraulic requirements
- Longer channel runs possible up to one outlet point
- Suitable for retention (additional volume: NW 150 – 30 ltr./mtr; NW 200 – 40 ltr./mtr)

Outlet middle part

- To increase the outlet depth
- Construction height 300 mm

Outlet unit

- Sealed pipe connection DN 200 (KG coupling)
- Left/right rotation
- NW 150: DN 150 or DN 200 available
- NW 200: DN 200 or DN 300 available

Sustainability in action:

FA connection sleeve

FA outlet unit with outlet pipe

FA front caps

FA locking bar and pan head screw

BG-FLEX soffit drain element DN 100

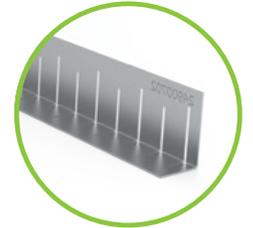

for BG-FLEX FA facade channel

Item no.	Accessories - BG-FLEX range	Material	Weight	Pcs./Pallet
23900226	BG-FLEX soffit drain element DN 100, material thickness 1 mm variable length (extendable from 300 – 500 mm), outlet DN 100	galvanised steel	1,5 kg	40

BG-FLEX FA gravel stop

Item no.	gravel stop – perforated	Material	Length mm	Weight
23900911	FA gravel stop, 60 x 40 mm, 2 mm thickness	aluminium	2000	0,9 kg
24900702	FA gravel stop, 80 x 50 mm, 2 mm thickness	aluminium	2000	1,3 kg
23900922	FA gravel stop, 80 x 80 mm, 2 mm thickness	aluminium	2000	1,5 kg
23900912	FA gravel stop 100 x 80 mm, 2 mm thickness	aluminium	2000	1,7 kg
23900916	FA gravel stop, 100 x 80 mm, with additional fold, 1,5 mm thickness	aluminium	2000	1,5 kg
23900924	FA gravel stop, 150 x 100 mm, 2 mm thickness	aluminium	2000	2,3 kg

FA gravel stop

BG-FLEX FA height adjustment for facade channels

Item no.	adjustable foot	Material	Height mm	Weight
24900201	Additional charge for height adjustment press nuts per 1 m section	galvanised		0,1 kg
24900202	Additional charge for height adjustment press nuts per 2 m section	galvanised		0,1 kg
24900301	Additional charge for height adjustment press nuts per 1 m section	stainless steel		0,1 kg
24900302	Additional charge for height adjustment press nuts per 2 m section	stainless steel		0,1 kg
24900203	FA adjustable foot M 10 X 30	L galvanised	30	0,1 kg
24900204	FA adjustable foot M 10 X 40	L galvanised	40	0,1 kg
24900205	FA adjustable foot M 10 X 50	L galvanised	50	0,1 kg
24900208	FA adjustable foot M 10 X 80	L galvanised	80	0,1 kg
24900303	FA adjustable foot M 10 X 30	L stainless steel	30	0,1 kg
24900304	FA adjustable foot M 10 X 40	L stainless steel	40	0,1 kg
24900305	FA adjustable foot M 10 X 50	L stainless steel	50	0,1 kg
24900308	FA adjustable foot M 10 X 80	L stainless steel	80	0,1 kg

FA adjustable foot M 10, galvanised

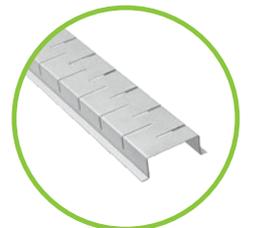

Please note that, for height-adjustable facade channels, the 1-metre channel requires 4 adjustable feet and the 2-metre channel 6 adjustable feet in the corresponding height.

BG-FLEX FA branch channels

to connect channels and outlet

Item no.	Branch channels	Length mm	Height mm	Weight
37851	FA branch channel, 1000/90/30, galvanised	L 1000	30	1,1 kg
37852	FA branch channel, 2000/90/30, galvanised	L 2000	30	2,2 kg

BG-FLEX FA Terrace point drainage

height-adjustable point drainage unit for roof terraces and balconies

Item no.	Terrace point drainage units	Length/Width in mm	Height mm	Weight
23910701	Terrace point drainage incl. slotted grating, aluminium	200	38-128	1,3 kg
23910702	Terrace point drainage incl. slotted grating with hole for inlet, DM 70, aluminium	200	38-128	1,3 kg
23910703	Terrace point drainage incl. slotted grating with hole for inlet, DM 100, aluminium	200	38-128	1,3 kg
23910706	Drainage tray flat, galvanised and blasted, outlet DN 100	200	40	0,5 kg

Terrace point drainage

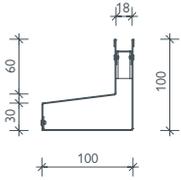

BG-FLEX^{TE}

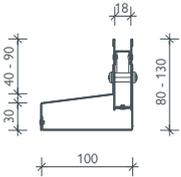

Terrace slot channel

BG-FLEX^{TE} terrace slot channel, SW 18 mm / 1" – STAINLESS STEEL

for the drainage of terraces and gardens

Fixed construction height

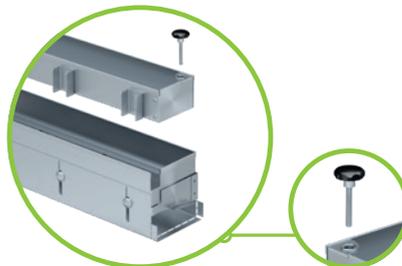

Variable construction height

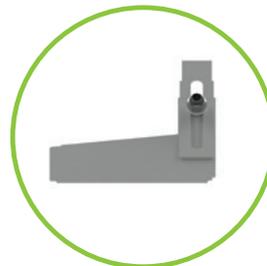

Item no.	Channel body asymmetric – material thickness 1.00 mm	Length mm	Height mm	Weight
38000	TE E SW 18 – closed	1000	100	3.0 kg
38010	TE E SW 18 – closed	1000	80 – 130	3.7 kg
38020	TE E SW 18 – perforated	1000	100	3.0 kg
38030	TE E SW 18 – perforated	1000	80 – 130	3.7 kg
Item no.	Gratings	Material	Pcs./Pallet	Weight
37955	TE slot inlay with square perforation 8/8 mm, L = 500 mm	stainless steel	200	0.1 kg
37956	TE slot inlay with square perforation 8/8 mm, L = 1000 mm	stainless steel	100	0.2 kg
Item no.	Accessories	Material	Height mm	Weight
38040	TE maintenance unit 500/100 with lateral or bottom outlet	stainless steel	80 – 130	3.0 kg
13399	TE opening tool for maintenance unit-cover – 2 pcs. required	plastic/galv. steel		0.1 kg
38050	TE external corner 200/200 – non-perforated	stainless steel	80 – 130	1.2 kg
38055	TE internal corner 200/200 – non-perforated	stainless steel	80 – 130	1.4 kg
38060	TE front cap left/right, width 100 mm	stainless steel	80 – 130	0.1 kg

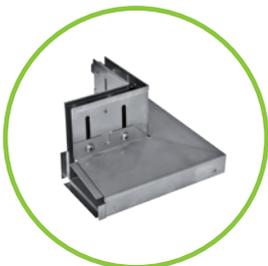

TE slot inlay with square perforation 8/8 mm

TE maintenance unit 500/100 with outlet: bottom DN 75 / at the side DN 50

TE front cap left/right, width 100 mm

TE external corner 200/200 – non-perforated

TE internal corner 200/200, non-perforated

BG-FLEX™ terrace channel

BG-FLEX™ TM terrace channel, width 60 mm / 2" – STAINLESS STEEL

for drainage of paving on terraces and balconies

Item no.	Channel body	Length mm	Height mm	Weight
21106321	TM terrace channel with anchor plate	1000	30	2.1 kg
Item no.	Outlet unit	Length mm	Height mm	Weight
21106322	Outlet unit, outlet Ø 50 with anchor plate	1000	30	2.1 kg
21106331	SET, corner section	1000x1000	30	4.1 kg

BG-FLEX™ TM terrace channel, width 60 mm / 2", LINEAR – STAINLESS STEEL

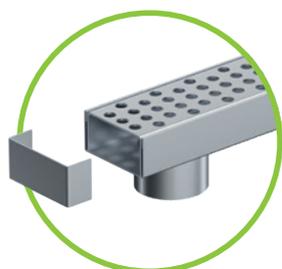

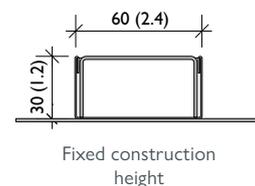

for drainage of paving on terraces and balconies

Item no.	Channel body	Length mm	Height mm	Weight
21106325	TM terrace channel LINEAR with anchor plate	1000	30	2.0 kg
Item no.	Outlet unit	Length mm	Height mm	Weight
21106326	Outlet unit, outlet Ø 50 with anchor plate	1000	30	2.1 kg
21106332	SET, corner section	1000x1000	30	4.0 kg

Advantages of the new mini channel for terrace:

- Material thicknesses: Channel body 0.75 mm / cover 1.50 mm
- narrow, discreet look through channel width 60
- Installation simultaneously with the paving stones on the surface, no special substructure is required
- A film on the channel grating provides protection against damage while construction is ongoing
- DIY due to quick-and-easy installation

outlet unit incl. grating and front cap and connecting cap, bottom outlet DN 50

Outlet unit LINEAR incl. front cap/connecting cap, bottom outlet DN 50

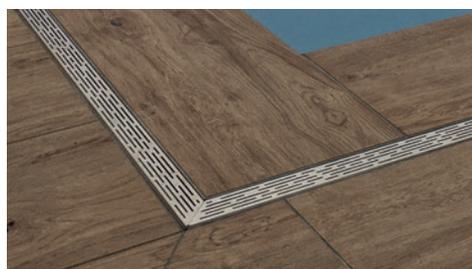

SET, corner section

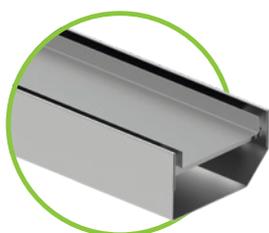

SET, corner section LINEAR

BG-FLEX stone made of stainless steel

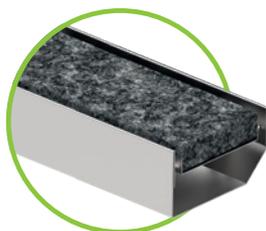

BG-FLEX stone, width 150 mm / 6" – STAINLESS STEEL

Non-perforated channel body made from 1.4301 stainless steel, incl. support bracket and stone basin; matching stone thickness 20 and 30 mm

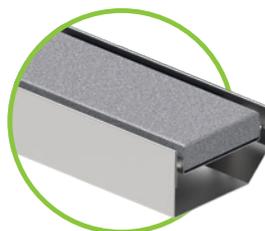

Item no.	Channel body	Length	Height	Weight
21115301	stone E, width 150, incl. crossbar and stone basin	1000	80	5.8 kg
21115302	stone E, width 150, incl. crossbar and stone basin	2000	80	11.6 kg
Item no.	Accessories	Length	Height	Weight
21115303	stone E, width 150, incl. support bar and stone trough with outlet Ø 100	1000	80	6.2 kg
24915326	Coupling sleeve for stone, width 150	50	46	0.1 kg
24915327	front cap stone, width 150	15	80	0.1 kg

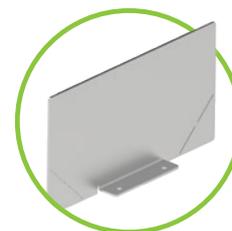

Delivery time on request.

BG-FILCOTEN®

BG-FLEX

As **unique** as your requirements.

Our special solutions.

We know that some challenges cannot be solved with standard channel elements. Our technicians will be happy to design special components or individual solutions for your requirements. With our know-how, we will produce what you need, and provide support on site.

Send us your project!

Our technical support will be happy to advise you and provide you with an overall quote for your project.

FA facade channel – adapted to the building

Slot tops for fountains / segment arches

FA facade channel – radial installation

TE terrace slot channel – curved

References

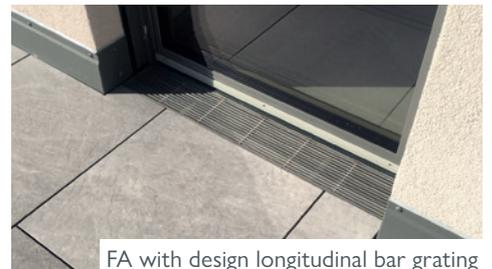

Slot top with drainage-slots for drainage of the second level

FA with mitred cut

FA with anti-slip mesh grating

FA with design longitudinal bar grating

Understated yet remarkably efficient & resilient:

Indoor slot channel system BG-FLEX omega

The ability to withstand heavy loads without a cover and, at the same time, ensure reliable and long-lasting drainage performance, makes the BG-FLEX omega slotted channel a simple, economical solution for your indoor drainage.

Thanks to the "V"-shaped channel bottom, liquids can be drained off safely and efficiently. An integrated odour trap is included in outlet units as standard.

Areas of application.

Food industry, industrial kitchens, slaughterhouses, wineries, breweries, etc.

up to class C 250

Visible edge with shimming

- Made of PVC, adhered in the edge
- for cavity-free, high load capacity grouting in the concrete/in the coating

Liquid-tight joints

- Bolted flange
- seal made from EPDM (alternatively made from Teflon or silicone)
- Complete with stainless steel bolting M 8

Corner piece

- Corner piece with leg length of 500 mm low cost and efficient corner solution
- Outstanding in traffic areas

Outlet elements incl. odour trap

- Outlet unit with horizontal outlet or vertical outlet (see outlet element above)
- various dimensions and heights for higher drainage capacity
- removable silt bucket
- solid cover navigable up to B 125, Class C 250 on request

Channel body made from stainless steel

- optimised omega shape for high drainage performance, easy cleaning and high stability (inbuilt slot bridge)
- Stainless steel 1.4301 or higher quality upon request
- Material thickness: 2 mm
- Slot width of 16 mm, no cover required

Connecting elements

- For corner, cross and T-connections
- also available with outlet

Channel with outlet

- vertical/horizontal outlet directly from the channel element
- freely chosen position in the channel run

Anchor plate

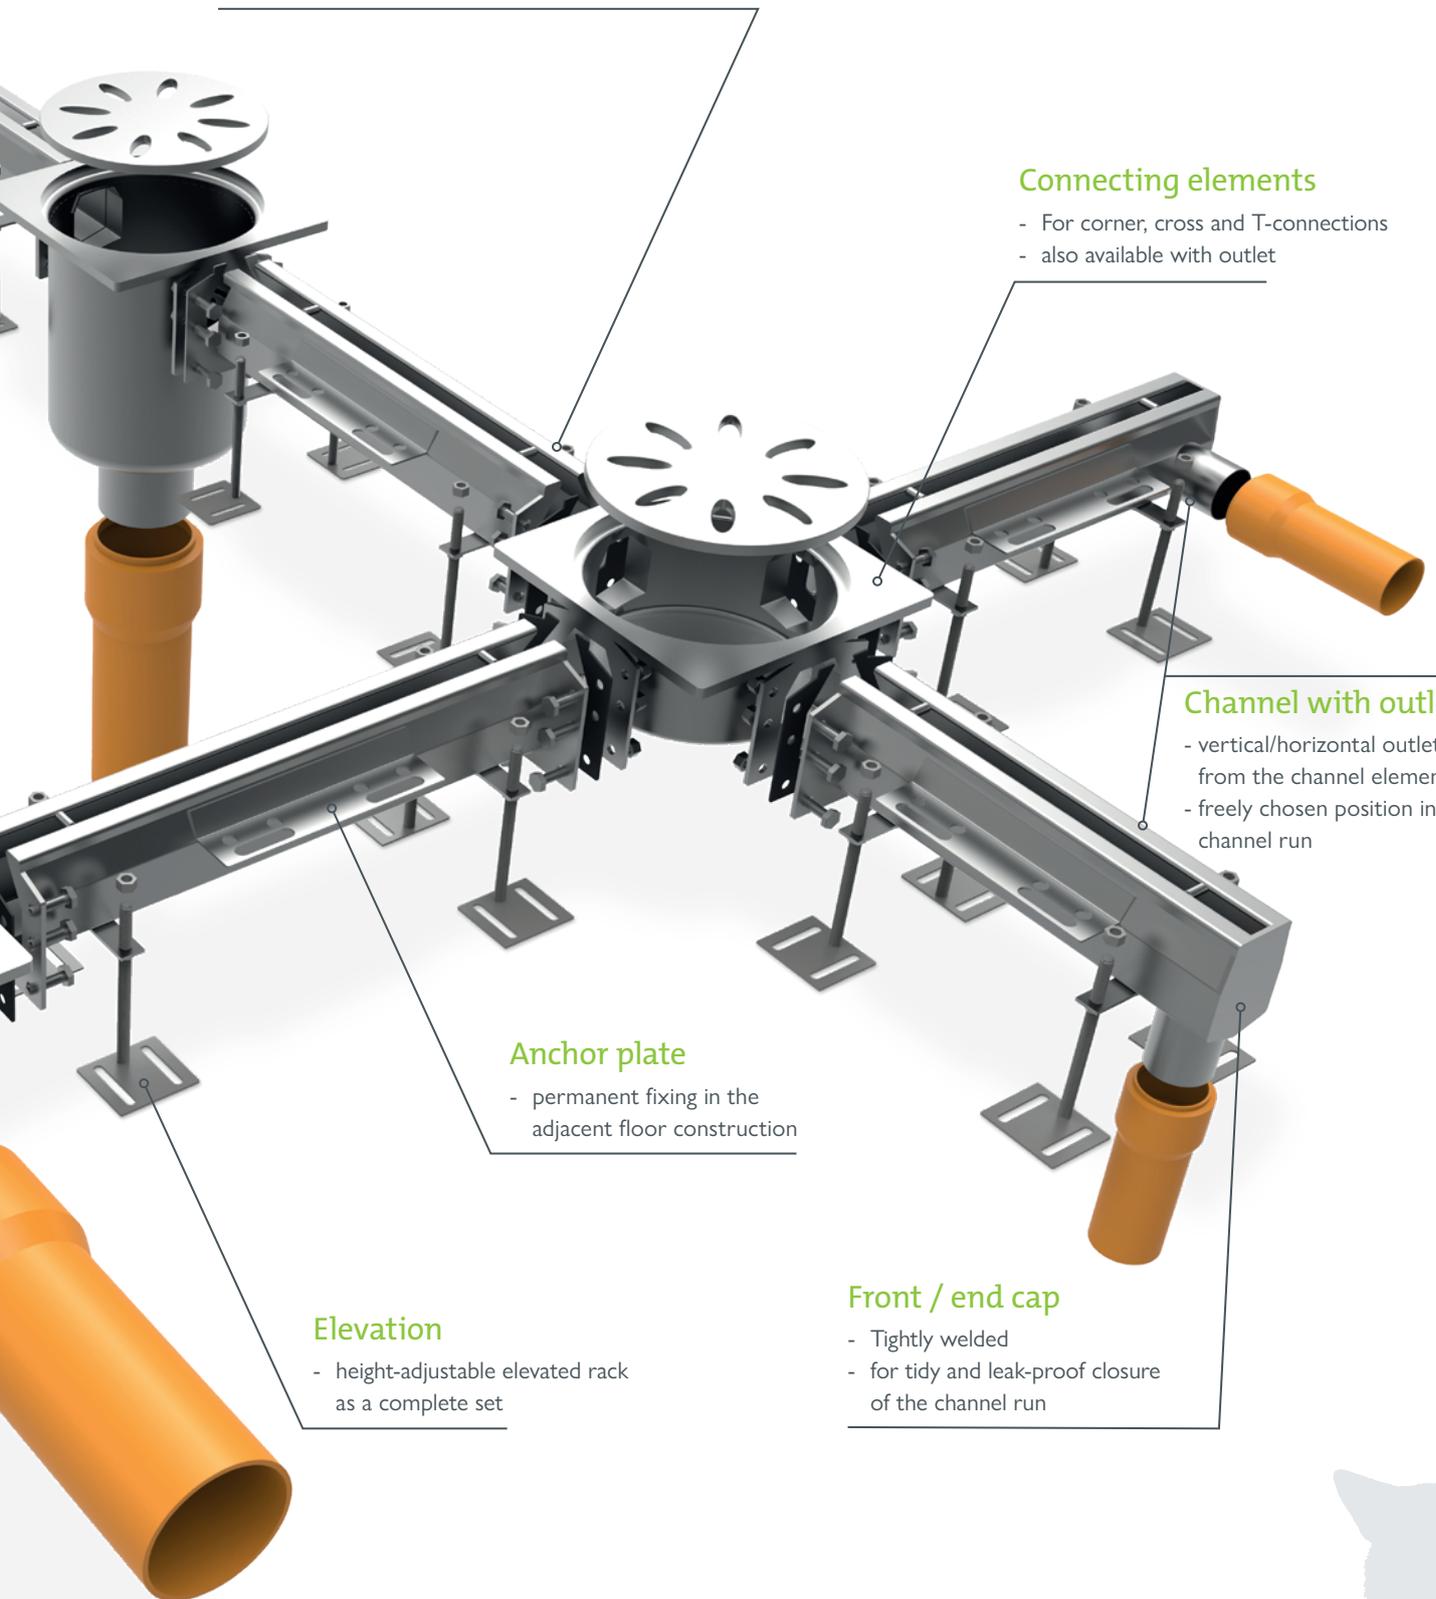

- permanent fixing in the adjacent floor construction

Elevation

- height-adjustable elevated rack as a complete set

Front / end cap

- Tightly welded
- for tidy and leak-proof closure of the channel run

up to class C 250

BG-FLEX omega

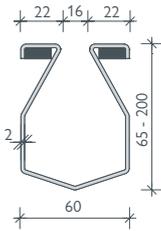

Indoor slot channel system

BG-FLEX omega SW 16 mm / 0,5" – STAINLESS STEEL

Channel elements with or without slope, with sealing flange for bolting

omega without slope – material thickness: 2.0 mm	Length mm	Height mm	Weight
omega – SW 16, without slope, various heights – flange at both ends	to max. 3000	65 – 200	4.4 – 25.5 kg
omega with 0,5 % slope – material thickness: 2.0 mm	Length mm	Height mm	Weight
omega – SW 16, with 0.5 % slope, different construction heights – flange on both sides	to max. 3000	65 – 200	4.5 – 24.6 kg

with seal

BG-FLEX omega outlet element incl. odour trap

for BG-FLEX omega slotted channels, with silt bucket, in various sizes and heights, for vertical or horizontal connection

omega outlet units incl. odour trap and silt bucket	Material	Height mm	Weight
omega outlet element 247 x 247 with silt trap, with outlet Ø 100, for vertical connection	stainless steel	260	8.3 kg
omega outlet element 247 x 247 with sediment bucket, with Ø 100 outlet, for horizontal connection	stainless steel	260	8.3 kg

Other outlet units for higher hydraulic capacity available upon request.

omega outlet elements incl. odour trap and silt trap, horizontal outlet

omega outlet elements including odour trap and sediment bucket vertical outlet

Please note that these products are manufactured to order – they are not stock products!

Coated concrete has a new best friend ...

Drainage channel system BG-FLEX sigma tec

BG-FLEX sigma tec, the drainage system for commercial buildings, is made of stainless steel 1.4301 or a higher grade. The product is the ideal solution for draining accumulating surface water from coated concrete surface coverings. Floor coatings can be laid so they are snug with the channel system for the long-lasting protection of the building structure.

Gratings of stainless steel or plastic, depending on the nominal width, can be selected from the BG-FILCOTEN® product range, up to load class C 250.

Areas of application.

Car parks, parking areas, food processing sites, chemical plants, breweries, dairies, supermarkets, catering, hospitals, etc.

up to class C 250

Liquid-tight joints

- Bolted flange
- NBR seal
- complete with stainless steel bolting M 6

front cap

- for a clean finish to the channel run
- Incl. surface strip
- With bolted seal

Perforated coating slot

- permanently connects the floor coating to the perforated slot connection plate

Elevation

- height-adjustable elevated rack as a complete set

Gratings

- COMBee plastic design-grating or mesh grating made from stainless steel
- Hole size 7 mm or MW 30/10
- Load class B 125 or C 250
- with fiX-locking
- bolting available at extra cost

Sump pit frame

- As connecting element
- also for T, corner and cross connections as stacking frame for a catch basin/sump pit constructed on site

Anchor bar

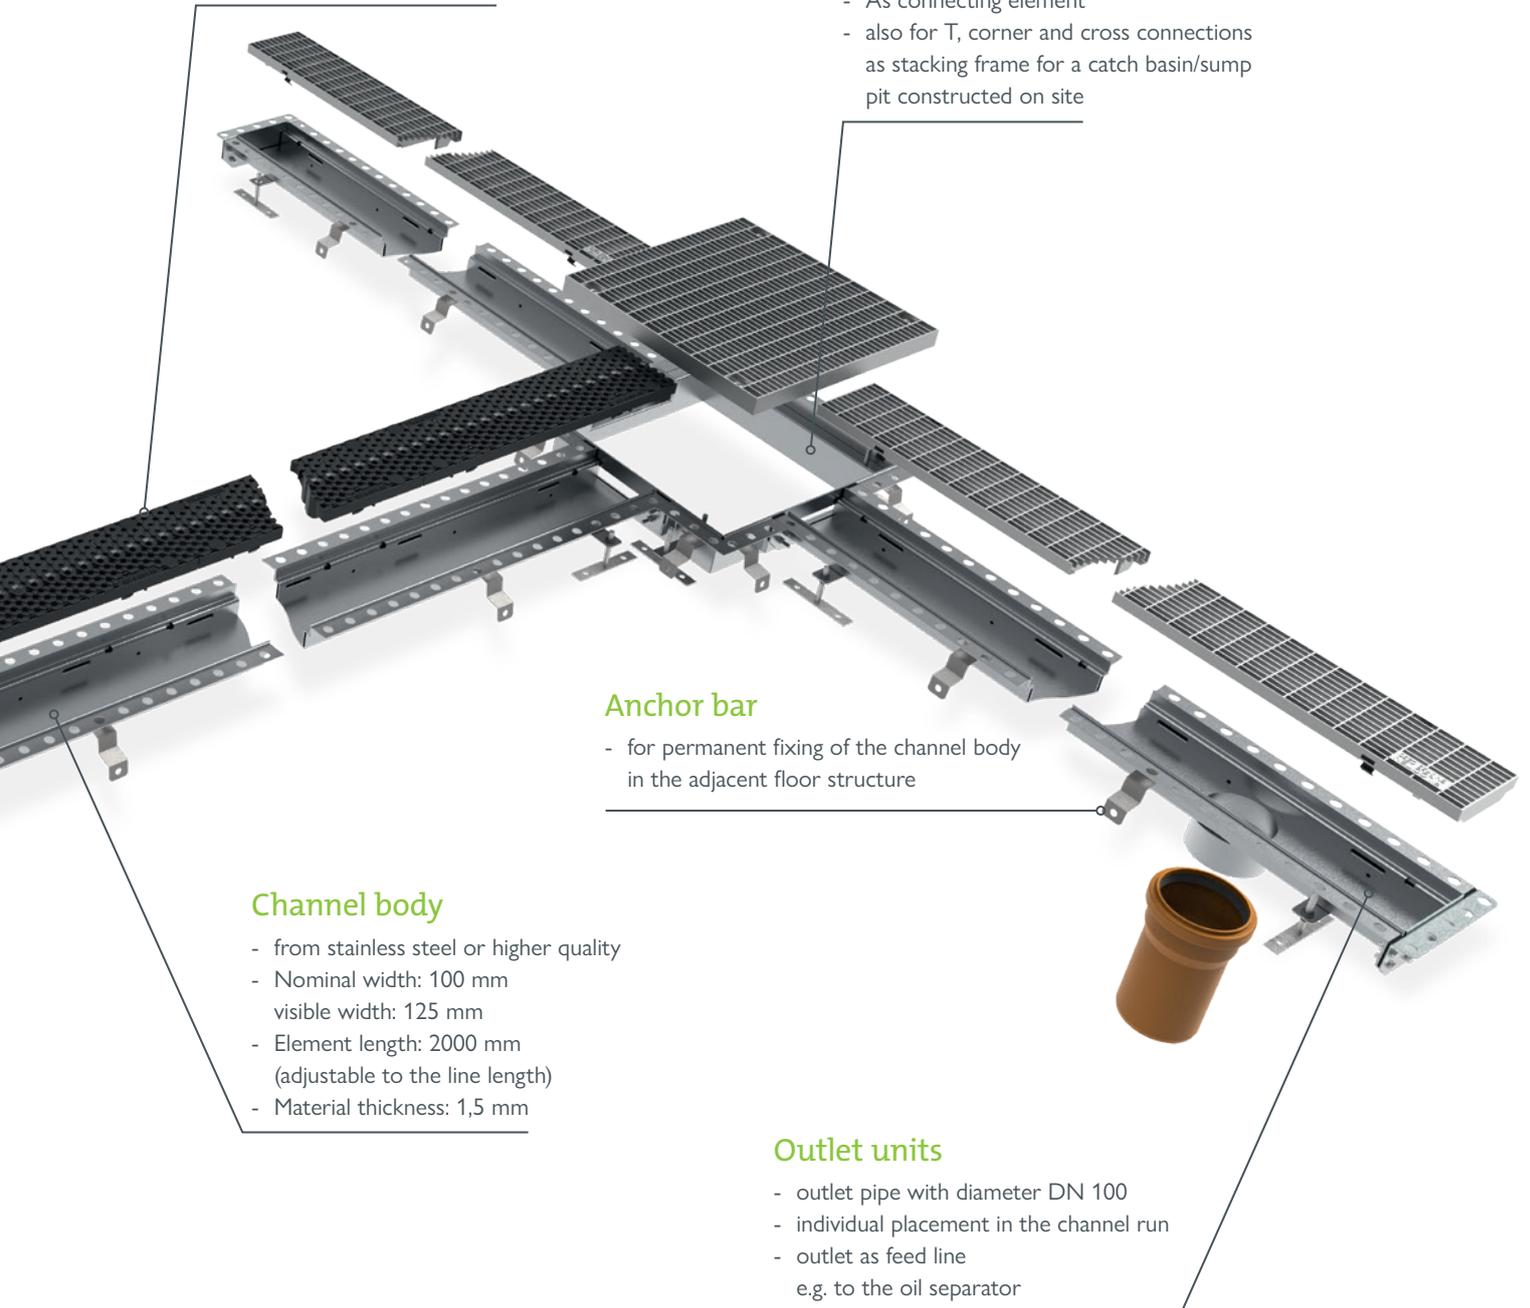

- for permanent fixing of the channel body in the adjacent floor structure

Channel body

- from stainless steel or higher quality
- Nominal width: 100 mm
visible width: 125 mm
- Element length: 2000 mm
(adjustable to the line length)
- Material thickness: 1,5 mm

Outlet units

- outlet pipe with diameter DN 100
- individual placement in the channel run
- outlet as feed line
e.g. to the oil separator

up to class C 250

BG-FLEX sigma tec

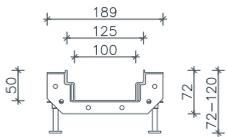

Drainage channel system

BG-FLEX sigma tec, nominal width 100 mm / 4" – STAINLESS STEEL

Channel elements without slope, with sealing flange Incl. elevated stand, seal and bolted butt joint; visible width 125 mm, internal height 50 mm

CITYGRID

Impact resistant Permeable Ground Grids made of 100% recycled/recyclable plastic – heavy duty

Item no.	Impact resistant Permeable Ground Grids	L/W/H	Weight	Pc./pallet
80090401	CITYGRID, Heavy duty permeable ground grid, 0.6/0.4/0.08m (24/15.75/3.15 in), tongue and groove connection, plastic	"60/40/8 mm 24/15.75/3.15 in"	9.0 kg / 19.8 lb	135

Permeable design

A rigid but open cellular design allows the grids to provide both exceptional support and water management.

Lightweight

Complies with HSE manual handling guidelines.

Flexible

Polymer construction is semi flexible and resistant to cracking unlike concrete.

High load

Meets high SLW vehicle usage specifications, up to 60 metric tonnes (DIN 1072).

Environmentally friendly

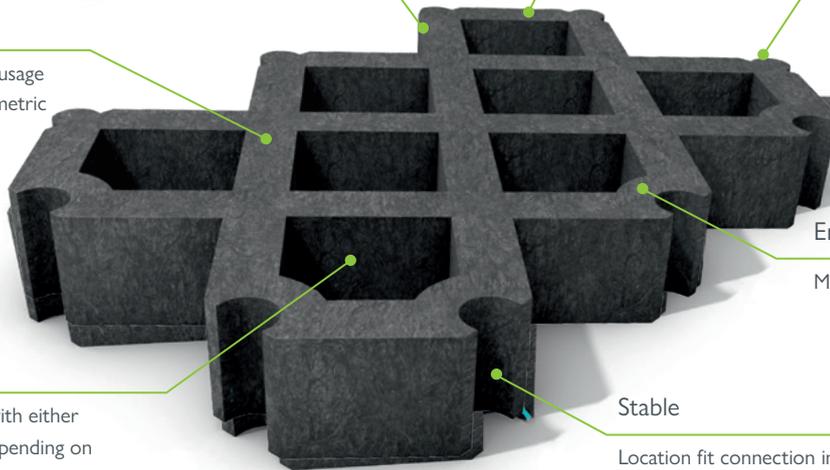

Manufactured from 100% recycled plastic.

Application options

Open cells can be filled with either gravel or soil and seed depending on your application.

Stable

Location fit connection improves stability once units are in position.

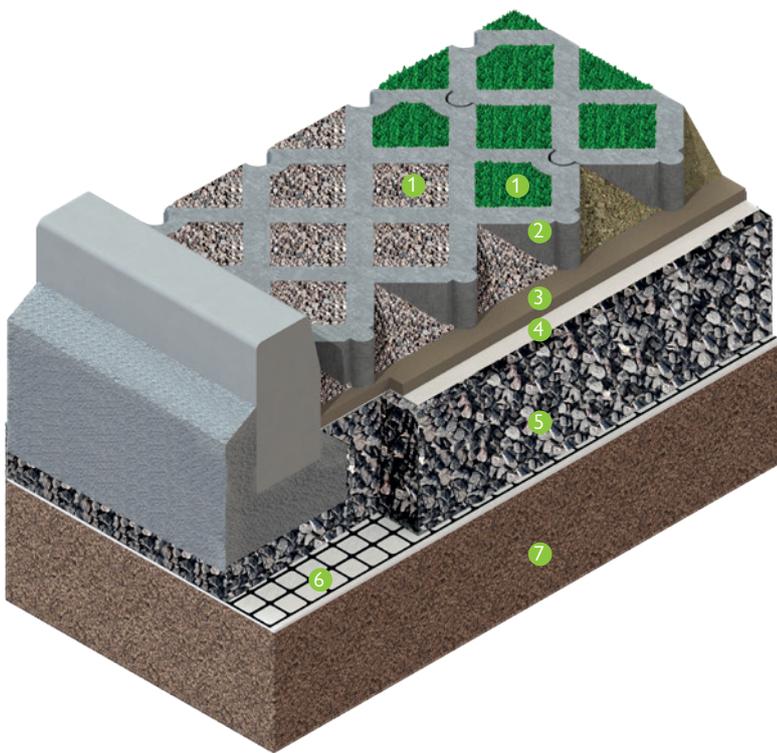

References

Typical installation example

Heavy duty permeable ground grid infiltration

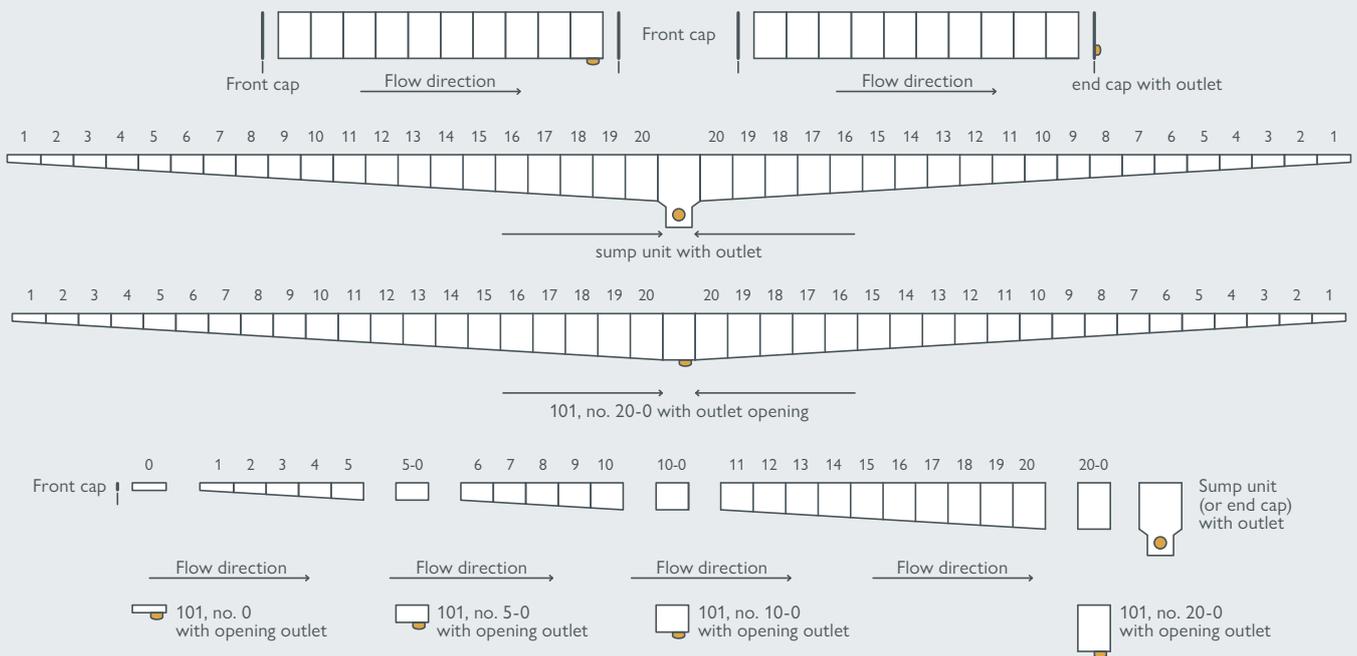

Key

- 1 Grass seeded or gravel finish
- 2 Citygrid units (permeable grid) Grass
Good quality, free-draining friable top soil, seeded at 6 - 10 lbs per 1,000 ft², pre-seeding fertilizer applied.
Gravel
Clean, free-draining angular crushed rock 0.2 - 0.6". Do not use rounded or river washed gravel.
- 3 Grit bedding
Clean coarse 0.08 - 0.25" grit compacted to 0.8".
- 4 Geotextile filtration layer
Non-woven needle-punched, minimum 3.25 oz/yd².
- 5 Free-draining engineered sub-base
Free-draining granular base with a depth to suit the anticipated loading. N.B. Standard granular base is not suitable as it's not free-draining.
- 6 Geotextile separation layer/Geogrid
30/30 geogrid on a non-woven needle-punched geotextile, minimum 3.25 oz/yd².
- 7 Sub soil
Establish CBR value to calculate depth of free-draining granular base.

Citygrid attenuation with gravel

A sealed geomembrane should be installed between the geotextile and the subgrade to prevent infiltration. Surface water should be directed to a suitable outlet.

Installation examples for BG-FILCOTEN® and BG-CLASSIC

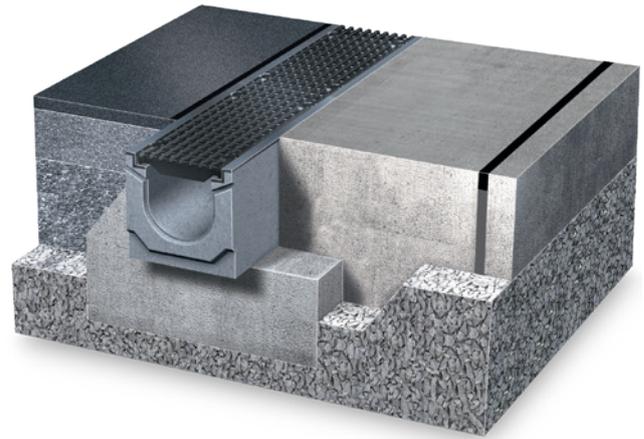

Installation of concrete channels without edges.

- resilient up to class C 250 kN
- paving stones or slabs can be laid directly next to the channel
- the grating's special construction ensures no concrete edges are visible (BG-FILCOTEN® light)
- separate gratings can be interlocked

CAUTION Starting, braking and torsional forces must be considered separately. Follow the installation instructions. Subject to technical modifications.

Installation of concrete channels with edges.

- resilient up to class F 900 kN – depends on channel model
- surrounding covering surfaces (asphalt, concrete) can be easily and neatly processed on the edges of frames
- if horizontal forces may occur (runway concrete), an expansion joint is to be installed at a distance of 30 – 150 cm
- gratings should primarily be bolted in place for load class D 400 kN and above
